

Why use steam vapour for automotive detailing?

RESTORES SHINE

Steam vapour and microfibre disintegrates dirt build-up to restore surfaces to its original lustre

DRY & DEODORISE

Superheated steam vapour dries interior surfaces within minutes

VERSATILE

Vapour gets into awkward crevices and spaces

WATER SAVER

Uses the power of steam vapour rather than large amounts of water and detergents

PACKAGES

Each of the below product packages comes with a range of tools and accessories. Visit carsteamcleaning.com.au to see complete product packages.

Jetsteam Evo Package

WHAT IS STEAM VAPOUR?

What **IS** steam vapour

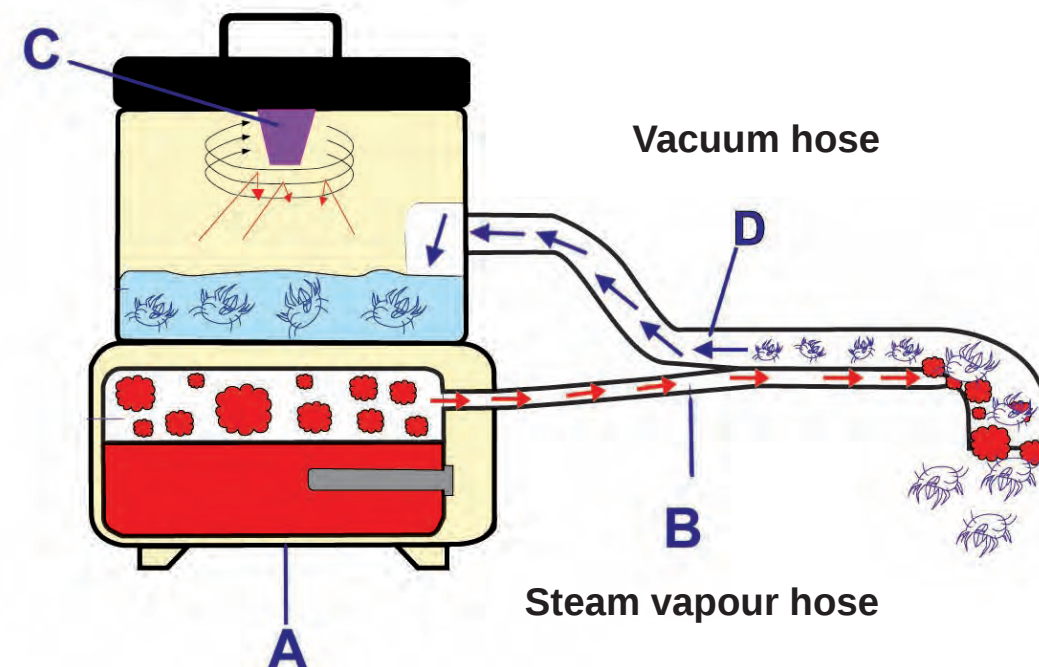

- ✓ Steam vapour that is produced at a high temperature (+160 degrees Celsius)
- ✓ Must be a "vapour" - not a water spray
- ✓ Low moisture / dry vapour

What **IS NOT** steam vapour

- ✗ Pressure washing
- ✗ Hot water extractor
- ✗ Equipment that doesn't have a boiler
- ✗ Vacuum only cleaning

HOW STEAM VAPOUR AND VACUUM WORKS

Vacuum system

Steam vapour boiler

- A) The steam vapour boiler generates steam vapour
- B) Steam vapour is emitted via the steam hose
- C) Vacuum system absorbs water/ residue
- D) Allergens, dirt and residue are lifted out via the vacuum hose

EXTERIOR CLEANING

Where and when to use steam vapour

Our machines come with a range of accessories, tools and connections to clean different exterior surfaces.
